

STAT

PLANS AND PROGRAMS STAFF WEEKLY REPORT FOR
PERIOD ENDING 28 SEPTEMBER 1983

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

a. Overseas ADP Capabilities. P&PS has summarized, in an MFR, the results of an investigation to place ADP capabilities in overseas environments, using personal computers for the processing of logistics data. The objective appears feasible. P&PS/ SAB is now analyzing hardware/software capabilities. The software most needed overseas is a practical form of ASAPS.

b. LIMS.

(1) Technical exchange meetings between OL/OF users and BAH representatives are continuing and are providing positive results in terms of a mutual exchange of information, ideas and concerns. Three meetings remain on the schedule in this series.

(2) Preparations are under way within the entire LIMS family to present the System Definition Review to OL and OF on 27 and 28 October. This preparation includes the development of a System Definition Document. P&PS has reviewed a preliminary draft of this document and has provided comments to BAH to correct and upgrade its contents. The final presentation will provide a more detailed insight into BAH's knowledge and understanding of LIMS requirements and functional processes.

c. Regulations Revisions. P&PS concurred in the proposed revision of [redacted] Numbering, and [redacted] Notices, with several recommendations to improve the regulatory system. We would like to see it clarified who uses the HRs and who the FRs, with [redacted] installations particularly in mind.
